

IBEX Release Notes

1. Version Information

Item	Description
Firmware Version	V2.2.62
Models	IBEX335L
Mobile Client	ThermTec Outdoor APP

What is new:

1. Added display of horizontal offset angle (roll angle) and pitch angle helps users quickly assess the device's horizontal state.
2. Integrated One-Shot Zeroing + RAV Sync algorithm into IBEX.
3. Added an option in the ballistics data to switch between MOA and MIL units, accommodating the preferences of different users.
4. Optimized to prevent false triggers of the Anti-Burn function, ensuring stable and continuous screen display during critical moments.
5. Optimized image algorithms.
